

Mr Roger Bell

MBBS FRACS

Vascular Surgery

Mr Roger Bell works at St Vincent's Private Hospital Fitzroy.

Mr Roger Bell is a dedicated, highly skilled Vascular, Endovascular and Transplantation surgeon with over 25 years of surgical experience.

His experience covers the entire spectrum of vascular disorders and he treats patients using open and endovascular procedures. Conditions treated include peripheral vascular disease, carotid stenosis, aortic aneurysms, varicose veins and other venous disorders. He has a leading role in the renal transplant unit at the Monash Medical Centre performing numerous transplantation and dialysis operations each year.

Mr Bell has developed a particular interest in the management of hyperhidrosis (excessive sweating) and facial blushing by endoscopic thoracic sympathectomy and has performed over 1000 procedures with outstanding results over the past 15 years, as well treating plantar hyperhidrosis with lumbar sympathectomy and MiraDry for axillary hyperhidrosis.

Other interests include the management of Endofibrosis in elite athletes with elite cyclists and athletes travelling from interstate to Melbourne for treatment.
